SGPERA

GOUTFNADRIR

DID YOU KNOW ???

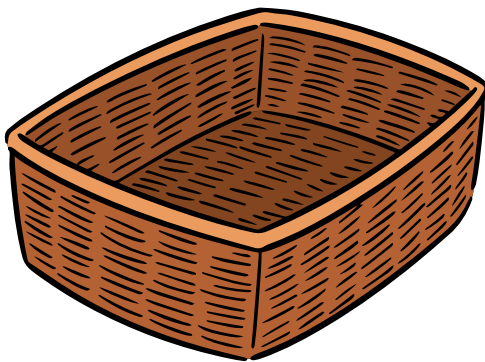

Some fruits have seeds inside, and some don't.

Seed fruits are fruits that have seeds. You can find the seeds in the middle or spread all around the fruit. Apples, oranges, watermelons, and mangoes all have seeds. Some seeds are small, and some are big!

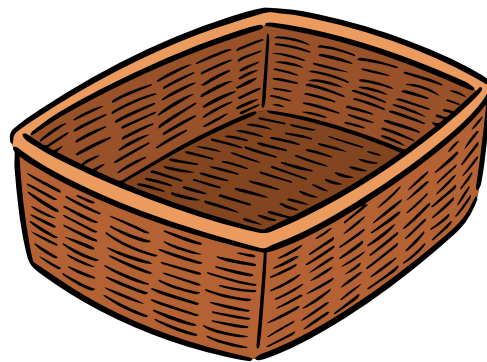

Non-seed fruits are fruits that do not have seeds. These fruits are usually grown without seeds by farmers. Some fruits like bananas, grapes, and pineapples don't have seeds at all! Seeds help fruits grow into new plants. But even if a fruit doesn't have seeds, it can still be tasty and good for you!

FRUIT GROUPING

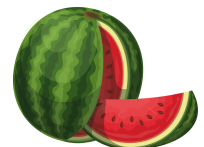

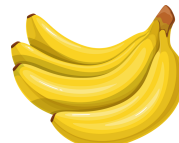

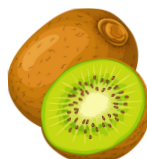

Can you group the fruits into seed fruits and seedless fruit based on what you read in the passage? Cut and paste the correct fruit into each basket.

SEED FRUITS

SEEDLESS FRUITS

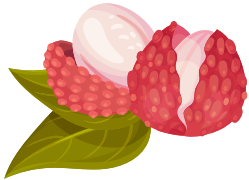

FRUITS AROUND THE WORLD

Fruits grow all around the world! Some countries have lots of certain fruits because the weather is just right. Some fruits even come from special places where they first started growing.

LYCHEE

China

PAPAYA

Mexico

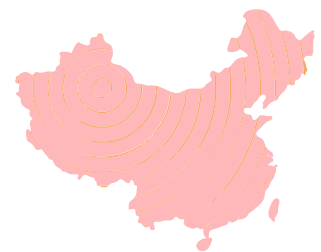

MANGO

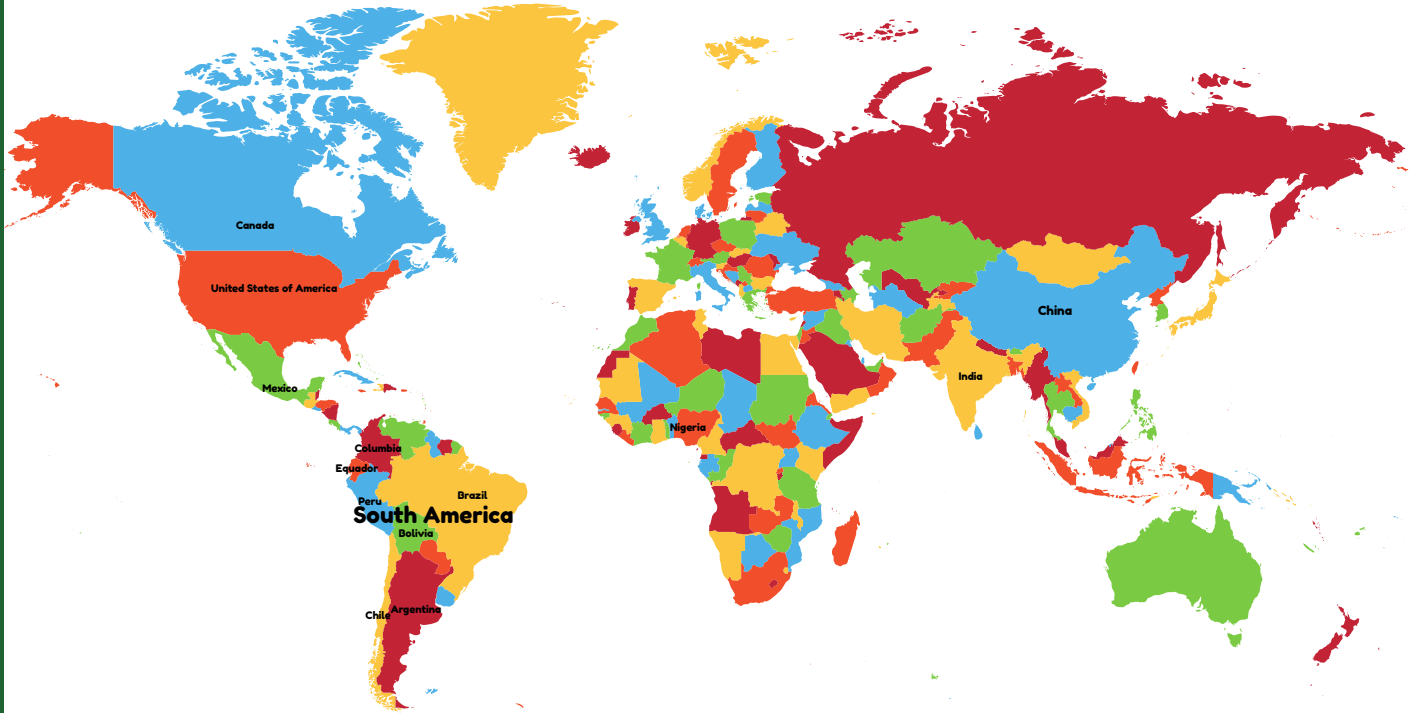

India

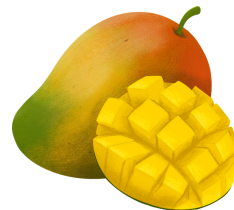

GUAVA

South America

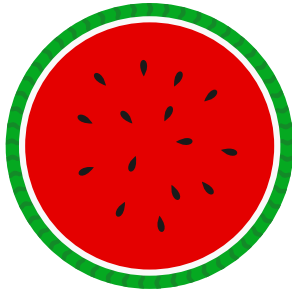

Cut and pin each fruit on the correct place on the map.

Fruit Fraction

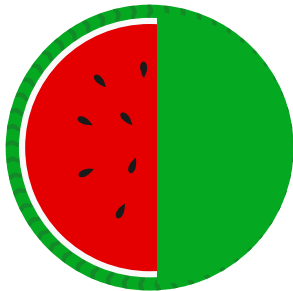

Match the right fraction to the fruit

•

•

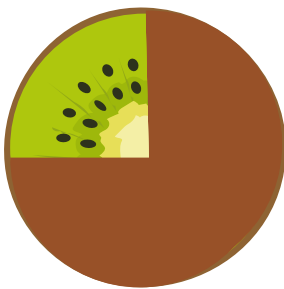

$$\frac{1}{4}$$

•

•

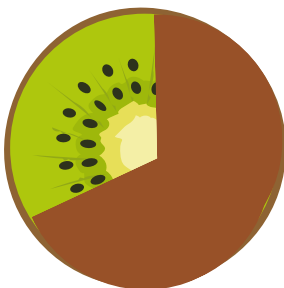

$$\frac{1}{3}$$

•

•

$$\frac{1}{2}$$

•

•

$$1$$
